Enter the year end date

## Simple setup Step 2.

### Name your herds

These entries can be herds, locations, paddocks etc. They create a drop-down used at the 'Cattle Register' animal entry point and automatically create lists (printable) that are searchable with or without other filters/criteria.

Herd 1
Herd 2
Herd 3
Herd 4
Herd 5
Herd 6
Herd 7
Herd 8
Herd 9
Herd 10

# Simple setup Step 2.

## Name your herds

These entries can be herds, locations, paddocks etc. They create a drop-down used at the 'Cattle Register' animal entry point and automatically create lists (printable) that are searchable with or without other filters/criteria.

Herd 1
Herd 2
Herd 3
Herd 4
Herd 5
Herd 6
Herd 7
Herd 8
Herd 9
Herd 10

Enter a herd name

# Simple setup Step 2.

## Name your herds

These entries can be herds, locations, paddocks etc. They create a drop-down used at the 'Cattle Register' animal entry point and automatically create lists (printable) that are searchable with or without other filters/criteria.

Herd 1
Herd 2
Herd 3
Herd 4
Herd 5
Herd 6
Herd 7
Herd 8
Herd 9
Herd 10

Heifers

Enter a herd name

# Simple setup Step 2.

## Name your herds

# Simple setup

## Step 5.

Enter your 5 main  
Breeds.

eg. Angus

Only 4 other questions to answer in setup

These breeds will be added to an existing drop-down of all existing breeds but will appear at the top of the drop-down for ease of use. The breeds you nominate will also appear further down in the list but this helps eliminate long scrolling.

# Simple setup Step 5.

## Enter your 5 main Breeds.

These breeds will be added to an existing drop-down of all existing breeds but will appear at the top of the drop-down for ease of use. The breeds you nominate will also appear further down in the list but this helps eliminate long scrolling.

eg. Angus

# Simple setup

## Step 6.

### Your preference of precodes.

In this version of the Cattle Register record keeping spreadsheet, year precodes for tags should be entered as part of your tag number at animal entry point on the Cattle Register entry page. If no entry is made here the drop-down at the animal entry point will be over-ridden by the alphabet code adjacent to the entry points on this page. They are year codes that denote eg. 2021 = S, 2022 = T etc. eliminating O and I as they can be confused with Zero and One. The alphabetical cycles with the years. In this version the entries in this drop-down are searchable and can be mixed with other filters/criteria to narrow the search.

	A
	B
	C
	D
	E
	F

	Y
	Z

# Simple setup

## Step 7.

Add any colours of stock you may have not already included in list

Red

Black

Brown

White

Grey

Cream

BL & Wh

Red & Wh

Tan

Black/Brindle

Tan/Brindle

Speckled

## Simple setup Step 8.

It is possible here to create a drop-down of special alerts that may be different from other

**criteria** e.g. Cows needing dehorning.

(they may be in different herds/locations) This enables a printable list to be created of animals that have a specific alert. The alerts are set on the individual animals own page via a drop-down.

Alert	
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	10
11	11

Basic setup is done

The lists on the SEARCH PAGES are useful for printing and adding comments in the field or yards. While the lists, as they are, are useful to identify and observe various traits and types of animals, don't add comments to these pages on the computer. The alignment of these pages is set for printing and the comments would remain on the pages after the search criteria is changed and then not be relevant. Instead, add comments to your printed sheets. Then transfer these, if desired, to individual animal pages. OR use 'Search by Number 2' to go directly to individual animal page if using your computer in the field. The program has capacity to print 250 animals per list, although if not using the 'Add' searches, there is allowance to see all 1000 animals on a 'Next Page' feature. Add-on searches allow for individual searches 0-250/251-500/501-750/750-1000 at a time.
