Add Age & Mothers No.

Add Balance days withholding

The lists on the SEARCH PAGES are useful for printing and adding comments in the field or yards. While the lists, as they are, are useful to identify and observe various traits and types of animals, don't add comments to these pages on the computer. The alignment of these pages is set for printing and the comments would remain on the pages after the search criteria is changed and then not be relevant. Instead, add comments to your printed sheets. Then transfer these, if desired, to individual animal pages. OR use 'Search by Number 2' to go directly to individual animal page if using your computer in the field. The program has capacity to print 250 animals per list, although if not using the 'Add' searches,

The lists on the SEARCH PAGES are useful for printing and adding comments in the field or yards. While the lists, as they are, are useful to identify and observe various traits and types of animals, don't add comments to these pages on the computer. The alignment of these pages is set for printing and the comments would remain on the pages after the search criteria is changed and then not be relevant. Instead, add comments to your printed sheets. Then transfer these, if desired, to individual animal pages. OR use 'Search by Number 2' to go directly to individual animal page if using your computer in the field. The program has capacity to print 250 animals per list, although if not using the 'Add' searches, there is allowance to see all 1000 animals on a 'Next Page' feature. Add-on searches allow for individual searches 0-250/251-500/501-750/750-1000 at a time.

And then there are the lists and printouts that are auto-generated from your previous setup preferences
